

AchievoEDU

Reward Success Inspire Growth

Australian schools' reward and positive behaviour platform

The Problem

Positive student behaviour often goes unrecognised. Staff may have no consistent system for rewarding effort, tracking progress, or building school culture. Behaviour management tools focus on the negative, while AchievoEDU accentuates the positive.

The Solution

AchievoEDU gives every school a complete positive behaviour platform with points, badges, house competitions, character development, a student store, parent visibility, and powerful analytics. All in one system, built for Australian schools.

Features Include

Points & Rewards

Award points for positive behaviour. Students can then redeem in the school store for tangible rewards

Badge system

Reward students with badges that represent academic, social, and wellbeing milestones. Students display them proudly.

Wellbeing Check-ins

Daily mood tracking, micro-challenges, and reflection prompts. Admin-visible trends help support staff identify students who need more help.

Analytics & Reports

Real-time dashboards, displaying behaviour heatmaps, wellbeing trends, platform usage and exportable reports.

Student Voice

Give students a real say. Create polls for lunch menu choices, schoolwide events, challenge rewards and so on.

Leaderboards

School-wide, year group, and house leaderboards with a smart nearest-neighbours view so every student feels part of the competition.

Mentorship Module

Senior leaders mentor juniors with matching, buddy challenges and connection tracking.

Parent Portal

Parents see their child's progress, badges, and behaviour feed in real time.

School Notices

Teachers and admins can publish notices filtered by year level, gender, and house. Students and parents only see what's relevant to them.

House Competitions

Live leaderboards drive school-wide culture and friendly competition.

Character Progression

A character trait hexagon framework that tracks student growth over time.

Australian Data Hosting

All student data stored on Azure servers in Sydney. Privacy Act compliant.
